

# MEET THE UP BOX

*"An exemplary printer  
that sets new standards  
in safety and HD print quality"*

## THE BOX MEANS BUSINESS

Designed specifically for educators and professionals looking for fast, hassle-free 3D printing with exceptional quality. The new UP BOX boasts a host of features, from Smart Support, user-friendly software and automatic levelling, to paper-thin layer HD resolution with a heated build platform. Everything about this printer is geared towards creating high standard professional 3D models.

## SAFE CLASSROOMS

The majority of all 3d printers produce particle emissions during the printing process.

*"Both ABS & PLA can be characterized as high emitters of Ultra Fine Particles."*

Report on UFP emissions from 3D printers  
<http://goo.gl/Eb2SAo>

The UP BOX solves this big issue with it's built in HEPA air particulate cleaner, thus greatly reducing airborne particulates. Providing a safe printing environment for students and teachers in any classroom.

## UP BOX FEATURES

- HEPA filtration system to remove air-borne contaminants
- Well engineered with internal steel chassis and impressive HD 100 micron 3D print resolution
- Fully automatic platform leveling and height sense – no human interaction required
- Improved 3D printing speed – 30% faster than previous models
- Full unrivalled 12 month warranty and you'll be backed up by our local support centers. We stock a full range of spare parts and consumables at the ready, when you require them. We're here to help you!
